ABOUT

Frontend-focused Fullstack Developer specializing in UX and data-driven interfaces. I build end-to-end applications — from business analysis to implementation.

STRENGTHS

- End-to-end development (frontend + backend integration)
- Designing UI for analytical and data-driven systems
- AI integration (chatbots, tools supporting content workflows)

EXPERIENCE

IBERION

2025.11-present

Frontend Developer

- Built analytical tools for editorial teams, improving content analysis and decision-making
- Developed AI-powered content assistant features: article structuring, image selection, and inline editorial suggestions
- Owned the frontend from architecture to deployment

AGENTIC

2025.01-2025.11

Frontend Developer

- Designed frontend architecture: modularity, authentication, payment integration (React, Next.js)
- Developed chatbot with streaming and advanced interaction
- Implemented i18n and integrated with a graph database
- Implemented unit testing using Jest
- Built analytical dashboard based on business requirements + UX analysis

IBPM

2023.02 - 2025.02

Fullstack Developer

- Developed backend for mobile application (Node.js) and supported microservices architecture
- Built dashboard for managing field technicians (Vue, BPM)
- Developed AI chatbot UI with knowledge base and live chat integration (React, Next.js)
- Implemented API integrations and managed complex UI state

FREELANCE

2022.07 - present

Frontend Developer (freelance)

- Designed and implemented landing pages, e-commerce sites, and UX improvements

ANKON

2019.02 - 2022.06

Grafik

- Designed marketing and promotional materials for agency clients
