

Agnieszka Koń-Kogut

FULLSTACK DEVELOPER (FRONTEND-FOCUSED)

konagnieszka@gmail.com | 723 941 103 | Gdańsk / Remote | [LinkedIn](#) | [GitHub](#)

ABOUT

Fullstack Developer with almost 4 years of commercial experience building AI-powered and data-driven applications - from business analysis to deployment. I take full ownership of projects, driving them from initial concept through to production, with a natural eye for UX shaped by a graphic design background.

SKILLS

Core: React, Next.js, TypeScript, JavaScript

Frontend / UI: HTML, CSS, SCSS, Tailwind, ChakraUI, Redux Toolkit, TanStack Query, Vue, JEST, Accessibility, Figma

Backend / Tools: Node.js, Nest.js, Express, REST API, SQL, ClaudeCode, Docker, Argo, Grafana

EXPERIENCE

IBERION Frontend Developer | 2025.11 - present

- Built an internal analytics hub with 3 tools used by 100–200 employees: AI-powered content composer (with verification and asset tagging), research tool generating insights from a given thesis, and a trends board surfacing popular topics
- Implemented authentication, authorization, and custom middleware for the hub
- Owned full UX/UI design - consulted directly with users and translated complex backend flows into intuitive interfaces
- Monitored application usage in production and maintained test coverage
- Stack: React, Next.js, TypeScript, Tailwind, TanStack Query, REST API, Jest, Grafana, Docker, Argo

AGENTIC Frontend Developer | 2025.01 - 2025.11

- Built a legal-sector SaaS chatbot with advanced response streaming, delivering answers in multiple formats: tables, charts, and graph database visualizations
- Participated in full frontend development — from architecture planning and REST API design to integration and E2E tests
- Implemented secure authentication, authorization and payment integration (Stripe) with custom middleware — applying OWASP-aligned practices including XSS prevention and input validation
- Collaborated closely with a graphic designer, contributing UX insights and business analysis
- Built an analytical dashboard for accountants with reporting options, data visualizations, and business process integrations
- Application passed user testing and is currently live in production
- Stack: React, Next.js, TypeScript, TanStack Query, Redux, Jest, Playwright, REST API, Grafana, Docker, Argo, Nest.js

IBPM Fullstack Developer | 2023.01 - 2025.02

- Maintained and extended a field technician management system for one of Poland's largest telecom providers - including a Vue.js dashboard, microservices architecture, and a mobile app backend (Node.js/Express.js)
- Conducted extensive business analysis, API integrations (Swagger/OpenAPI), and iterative improvements
- Built an AI chatbot product deployed across multiple client websites as a widget and as a standalone analytics dashboard - with advanced search, user permissions, admin board, and live chat fallback (human takeover)
- Implemented i18n and integrated with a graph database
- Stack: React, Next.js, Vue.js, TypeScript, ChakraUI, Redux, REST API, Node.js, Express.js, Docker, Jest

FREELANCE Frontend Developer | 2022.03 - 2022.12

- Designed, implemented and maintained commercial websites for private clients
- Handled full delivery cycle - from layout and development to deployment and ongoing support and hosting setup

ANKON Graphic Designer | 2019.02 - 2022.03

- digital marketing and promotional materials for agency clients
